

This document provides step-by-step instructions on getting the most from your Valtus Views | Spatial Data as a Service subscription. If at any time you have additional questions or need assistance on features not covered here, our contact information is provided in the last section. These steps only need to be completed the first time you add the Views imagery service.

To add the Valtus Views WMS services to Accumap:

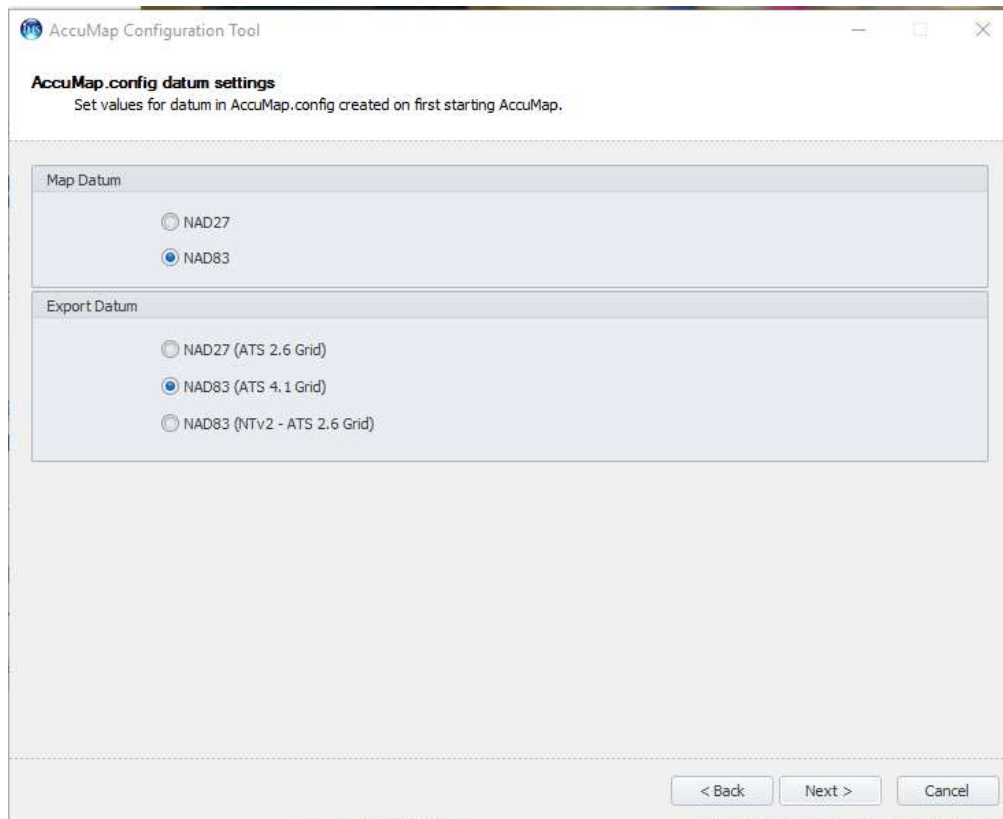

From the location where your Accumap is install on your PC, run the Admin Config tool

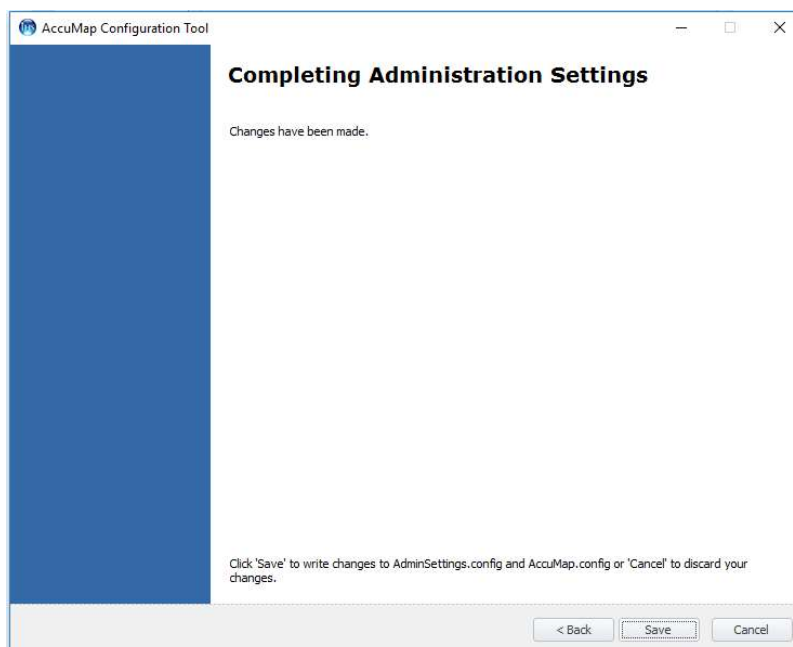

Keep clicking next until you get to the “Valtus Connection Parameters”

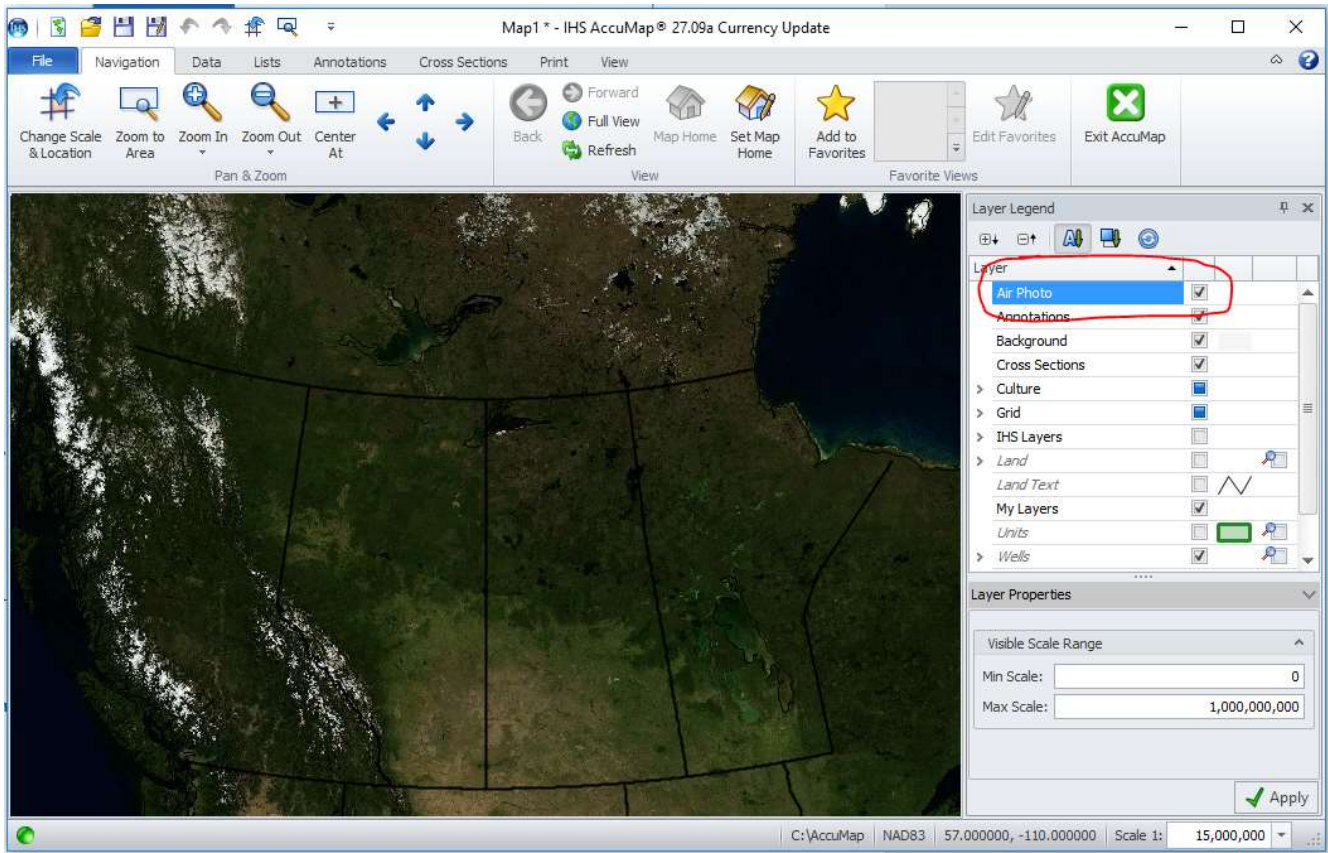

- Fill in the following URL: <http://www.valtus.com/views/wms>
- Fill in your Username and Password, and test the connection
- If connection is passed, click on next until you get to “AccuMap config datum setting

Select the Coordinate system you would like your Imagery and Vectors to be returned with and click “Next”

Save your settings, this will exit the Config tool

Start AccuMap, and toggle on the check box for “Air Photo”

The Valtus Technical Support Team is here to help. Should you require assistance or would like additional information, please contact us at support@valtus.com.
